

24hb_1xT candidate subpopulation full-ensemble densities
site assignments from crossover means; all stable frames shown

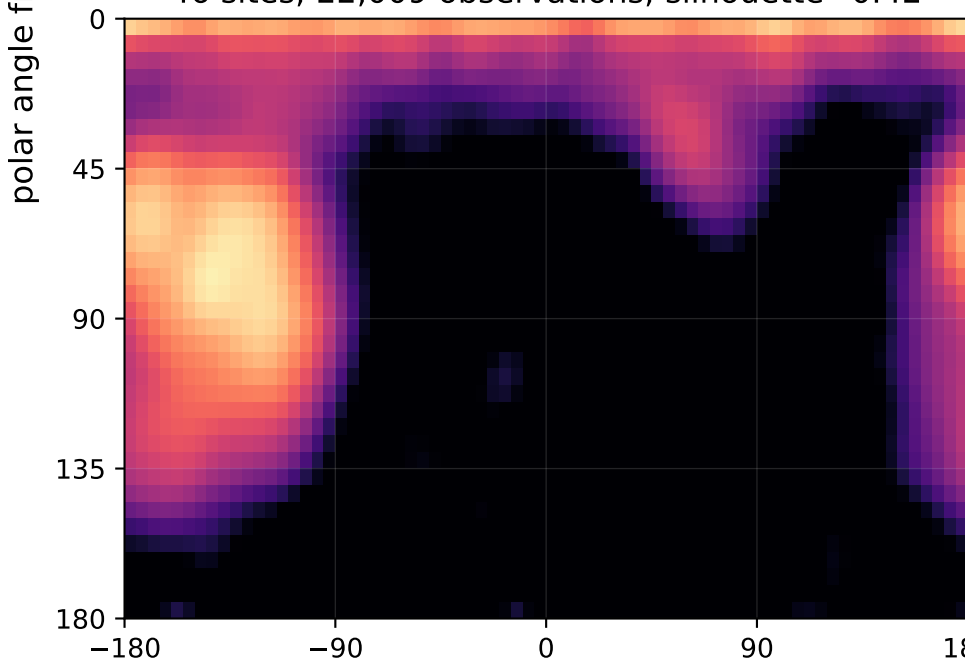

Lower-bp, candidate component 1
87 sites; 41,020 observations; silhouette=0.35

Lower-bp, candidate component 2
72 sites; 35,365 observations; silhouette=0.35

Higher-bp, candidate component 1
46 sites; 22,009 observations; silhouette=0.42

Higher-bp, candidate component 2
113 sites; 53,862 observations; silhouette=0.42
